

Welcome to the SAP Plant Maintenance Dashboard for BI, which allows you to easily visualize your SAP PM/EAM export data in Power BI. Once installed and connected to your data, you'll have immediate access to template reports and can quickly create customized reports with minimal effort based on the generic tabular model.

Please be aware that this app connects to data based on a d7 Microservice. You will need the Microservice to view your own data. Don't hesitate to ask us if you have any questions.

## Connecting your own data

After installing the app, you can connect it to your own data. The data model requires a few parameters from you, which you can provide either through the Power BI prompt **"Connect your data"** or via the refresh settings in the semantic model.

| Name                         | Status           | Type           | Task | Owner               | Refreshed              |
|------------------------------|------------------|----------------|------|---------------------|------------------------|
| SAP Plant Maintenance BI App | Schedule refresh | Report         | —    | SAP Plant Mainte... | 2/27/2026, 8:45:58 AM  |
| SAP Plant Maintenance BI App | ...              | Semantic model | —    | SAP Plant Mainte... | 2/27/2026, 8:45:58 ... |

**RangeStart** – The earliest date to import

**RangeEnd** – The latest date to import (can be in the future)

**Server** – Your Server address

**SAPClient** – Your SAP Client ID

## Connect to SAP Plant Maintenance BI App

Get started setting up your app! Start by filling in the parameters. Then, you'll authenticate to all the data sources this app connects to.

### Parameters

Make sure all required (\*) parameters are filled in before connecting to your data.

#### RangeStart \*

For example: 2019-01-01T00:00:00

#### RangeEnd \*

For example: 2024-12-31T00:00:00

#### Server \*

For example: https://d07.d7server.de/

#### SAPClient \*

For example: 800

## Using the app

When you open the app, you first arrive at the start screen. From there, you can access the reports via the **“Launch”** button. The other buttons allow you to contact us or visit our website and social media channels.

By clicking the **home icon** (the house symbol), you can return to the start screen at any time.

You can filter your data by using the slicers at the top. To see additional information on the data you can either hover over a bar or do a drillthrough on the data by right-clicking and selecting “drillthrough” and then “detail”

If you need any further assistance, please don't hesitate to contact us.
